PROJECTS

Bamazon —*App*

An app that acts as a store simulator like Amazon.

Utilizes MySQL database to store and update inventory.

Utilizes Node.js to prompt user through the shopping experience.

Liri Bot —*App*

An assistant app similar to Apple's Siri.

Utilizes Bandsintown API, Spotify API and OMDB API.

Allows user to search and retrieve data on concerts, songs, and movies using the command line.

Liri responds to four commands: 'concert-this', 'spotify-this', 'movie-this' And 'do-what-it-says'.

Train Time —*App*

An app that calculates train arrivals based on real time.

Utilizes Firebase to store train time data.

Utilizes Moment.js to run app in real time.
